## **Soil Test Information**

| Name             |             |                      | SUSTAINABILIT      |
|------------------|-------------|----------------------|--------------------|
| Farm             |             | Block                |                    |
| Date sampled     |             | Sampling depth       |                    |
|                  |             |                      |                    |
|                  |             |                      |                    |
| Bag sticker:     |             |                      |                    |
|                  |             |                      |                    |
| GPS:             | <u>S:</u>   | <u>E:</u>            |                    |
| Crop Class       |             | Yield Potential      |                    |
| Plant            |             | 150 t/ha □           |                    |
| Replant          |             | 180 t/ha □           |                    |
| Ratoon (specify) |             | Other                |                    |
| Harvest date:    |             | Expected plant date: |                    |
|                  |             |                      |                    |
| Fallow           | _           |                      |                    |
| Bare/grass       |             | Green Manure         | Harvested          |
| Legume           |             | Biomass (circle)     | Grain yield (t/ha) |
| Soybean          |             | Poor                 |                    |
| Mungbean         |             | Average              |                    |
| Cowpea           |             | Good                 |                    |
| Lab lab          |             |                      |                    |
| Other crop       |             |                      |                    |
| Ameliorants      | D-+- /+/ha\ | When applied         |                    |
| Mill mud         | Rate (t/ha) | When applied         |                    |
| Mill ash         |             | <del></del>          |                    |
| Mud & ash mix    |             |                      |                    |
| Gypsum           |             |                      |                    |
| Lime             |             |                      |                    |
|                  |             |                      |                    |
| Notes/Comment    | S           |                      |                    |
|                  |             |                      |                    |
|                  |             |                      |                    |
|                  |             |                      |                    |
|                  |             |                      |                    |

Kalamia - mud only

Invicta & Inkerman - mud & ash mix

| Number of samples:  |  |  |  |
|---|--|--|--|
| For a block less than 15 ha - minimum 20 samples For a block more than 15 ha - minimum 40 samples |  |  |  |
| Suggested sampling patterns   |  |  |  |
| Please draw block and mark sampling pattern (or mark on farm soils map)                           |  |  |  |
| Ticase draw block and mark sampling pattern (or mark on farm sons map)                            |  |  |  |
